CONTACT: MARY R. RIDGEWAY

PRODUCT TO PRODUCTION – GETTING STARTED FROM SCRATCH

Decide how you will manufacture your product. You cannot manufacture foods for sale to the Public at your domestic kitchen.

If using a co packer, begin the search for a reputable one.

If you plan to manufacture your product yourself, you need to contact the following for Rules and Regulations:

If your product is sold retail only, call DHEC Food Service – 803-935-7958

If your product contains more than 3% Beef, Pork, Chicken or Lamb, call Meat Inspection Service – 803-788-8747

If your product is a Dairy, Soft Drink or Water Product, call DHEC Dairy – 803-935-7890

If your product is a Shellfish product, call DHEC Shellfish – 843-740-1590

If your product is an alcoholic product, call ATF – 1-800-398-2282

If your product has not been mentioned so far, call South Department of Agriculture – 803-737-9690.

It would be wise to set up an appointment with SCORE. Their Columbia number is 803-765-5131. Their web page address is [www.sba.gov](http://www.sba.gov). They have valuable information on how to run a successful business. Their service is free and is excellent.

It is costly to start any business. Be aware you will need startup money before you will see any money from the sales of your product.

Investigate the cost of product liability insurance as many customers require it.

Research compatibility between your chosen label and the bottle (package) and what you and your co packer uses before any final decisions are made.

Begin work with the graphic artist on your label. You do not have to use a graphic artist but you will get the best possible look for your label from the start.

UPC Code will be needed if you plan to sell your product in Supermarkets. Their telephone number is 1-800-543-8137.

It would be a good idea to have your Product receive a FDA nutritional analysis. A computer generated analysis can be obtained from Clemson University. Phone Dr. Felix Barron 864-656-5694 or Dr. Susan Barefoot 864-656-3397. They can evaluate your canned/jarred Food Product. This is required if it contains any Low Acid Ingredients such as Milk, Vegetables, Meat and Seafood.

Excellent Networking with other Food Manufacturers can be done through the South Carolina Speciality Food Association. For information on activities, call Mary Ridgeway – 803-734-2144.

MINIMUM COOKING TEMPERATURES ARE AS FOLLOWS:

INTERNAL: BEEF (145°F), PORK (150°F), FISH (145°F), POULTRY (165°F), EGGS (145°F)

GROUND: BEEF (155°F), PORK (155°F), POULTRY (165°F)

EXTERNAL SURFACES: BEEF (155°F), PORK (155°F), POULTRY (165°F)

HOLD TEMPERATURE (OF ALREADY COOKED FOODS): 130°F OR ABOVE OR 45°F OR BELOW

## GUIDELINES FOR FOOD PROCESSORS - SOUTH CAROLINA DEPARTMENT OF AGRICULTURE

This material is condensed from Federal Regulations "Current Good Manufacturing Practices in Manufacturing, Processing, Packing or Holding of Human Foods" (21 CFR Part 110). FDA (803-765-5845).

### SECTIONS:

1. Definitions.
2. Grounds.
3. Building and facilities.
4. Equipment and utensils.
5. Sanitary operations.
6. Processes and controls.
7. Personnel.

#### Section 1. Definitions.

The definitions and interpretations contained in Section 39-25-20 of the South Carolina Food and Cosmetic Act are applicable to such terms when used in these guidelines. The following definitions shall also apply:

- a. "Food processing area" means any place where food products or their ingredients intended for human consumption are prepared, processed, repacked, handled or manufactured. A food processing area shall also include any room used for washing and storing utensils, equipment or other apparatuses that come into contact with foods or ingredients for foods.
- b. "Potentially hazardous foods" means any perishable food which consists in whole or in part of milk or milk products, eggs, meat, poultry, fish, shellfish or other ingredients capable of supporting rapid and progressive growth of infections or toxigenic microorganisms.
- c. "Sanitize" means effective treatment to physically clean surfaces of equipment, walls, refrigerators and utensils by a process which is effective in destroying microorganisms, including pathogens.
- d. "Shall" and "should." As used in these guidelines, "shall" refers to mandatory requirements and "should" refers to recommended procedures or equipment.

#### Section 2. Grounds.

The grounds around a food processing area under the control of the operator shall be free from conditions which may result in the contamination of food. Standing water, excessively dusty road, uncut weeds, litter and wastes which may attract insects, birds, rodents or other animals shall not be permitted.

#### Section 3. Building and facilities.

Food processing areas shall be suitable in size, construction and design to permit easy maintenance and a sanitary operation. Food processing areas shall be completely separated from living quarters by solid, impervious walls with no connecting openings.

- a. Walls and ceilings - Walls and ceilings shall be kept clean and in good repair. They should be constructed of tile, smooth surface concrete, cement plaster, FRP (Fiberglass Reinforced Plastic), or other suitable materials. The paint should be an oil base paint or epoxy and should be light colored.
- b. Floors - Floors shall be kept clean and in good repair. Floors should be constructed of smooth surface concrete, tile or other waterproof materials which can be easily cleaned.

## GUIDELINES FOR FOOD PROCESSORS - SOUTH CAROLINA DEPARTMENT OF AGRICULTURE

- c. Drains - Drains shall be installed where needed. Drains shall be adequate in size to prevent back-up clogging. They shall have proper traps and shall be kept in good repair.
- d. Sinks - There shall be a minimum of a mop sink-hand sink combination and a separate utensil sink to adequately clean and sanitize all utensils as needed.
- e. Water and sewage - The Department of Health and Environmental Control (DHEC) shall approve the Water Source and Sewage Disposal System whether private or public (Telephone 803-898-3432 for information). Plumbing shall be installed in a manner that will prevent back-flow. All Sinks, Drains and Toilets shall drain into a DHEC approved Sewage Disposal System.
- f. Hot water - An adequate supply of hot water shall be supplied to all sinks. The temperature should be maintained at a minimum of 140 deg. F at all sinks except hand washing sinks which should be maintained at a minimum of 110 deg. F.
- g. Hand-washing facilities - Convenient hand-washing facilities shall be available for use before handling any foods, their ingredients or equipment. There shall be adequate hot water and bactericidal soap at each hand-washing station. Single service, disposable towels should be supplied also.
- h. Lighting - There shall be ample light available to promote cleanliness and safety. Light bulbs over processing areas or open food or ingredients must be protected to prevent glass getting into the product.
- i. Ventilation - There shall be adequate ventilation to prevent condensation and disagreeable odors. All windows and doors left open for ventilation purposes shall be properly screened with 16-mesh screen. If an outside door opens directly into a processing room, an air or plastic curtain should be present.
- j. Rest room facilities - Rest room facilities shall be provided for personnel. Where rest room facilities are provided, associated hand-washing facilities shall also be provided. A sign shall be posted directing personnel to wash their hands with soap after using the toilet.

### Section 4. Equipment and utensils.

All equipment and utensils should be suitable for their intended purposes and properly maintained.

- a. Rusted and corroded equipment shall not be used.
- b. Food contact surfaces should be smooth, free from pits and crevices and relatively non-absorbent.
- c. Sponge rubber, stone slab, linoleum and unglazed ceramic shall not be used in equipment construction. Wood handled utensils should not be used.
- d. Each freezer and cooler shall be equipped with an accurate, easily readable thermometer.

### Section 5. Sanitary operations.

Floors, walls, ceilings, tables, work surfaces, equipment and utensils shall be clean and sanitary when put into service.

## GUIDELINES FOR FOOD PROCESSORS - SOUTH CAROLINA DEPARTMENT OF AGRICULTURE

- a. Food contact surfaces, equipment and utensils shall be cleaned and sanitized as necessary to maintain sanitary conditions. Sanitization may be accomplished with steam, hot water, chlorine or other approved bactericidal agents.
- b. Cleaned and sanitized equipment and utensils shall be stored in a clean, dry manner protected as much as possible from dust and other contaminants.
- c. Waste materials shall be removed promptly to prevent development of insanitary conditions and feeding areas for insects and rodents.
- d. A rodent and insect control program should be maintained and handled by a qualified individual or firm.

### Section 6. Processes and controls.

All reasonable precaution shall be taken to assure that production procedures do not cause contamination of food during processing.

- a. Raw materials shall be inspected to ensure that they are free from any contamination and fit for human use. Must be from approved sources.
- b. Meaningful codes should be used so that positive identification of specific lots can be made.
- c. Potentially hazardous foods shall be stored at an air temperature of 45 deg. F or less. Frozen foods shall be stored at an air temperature of 0 deg. F or less.
- d. Storage and transportation of finished products shall be under conditions that will prevent contamination and undesirable deterioration of the product and the container.

### Section 7. Personnel.

- a. No person affected with a communicable disease shall work in a food processing area.
- b. Personnel shall wear clean outer garments and maintain a high degree of personal cleanliness.
- c. Employees shall wash their hands thoroughly (and sanitize where necessary) before starting work, after each absence from the work area and any other time their hands may have become soiled or contaminated.
- d. Employees shall wear hair nets, caps, or other effective hair restraints.
- e. Personnel shall not eat or use tobacco in any form in a food processing area.
